

Study Strategies in College & Universities

Similarities:

- Both conduct tests and quizzes to test student's knowledge
- The classes are similar in nature; you are being taught something by a professor or teacher who has studied this topic for years and is there to help you gain knowledge about the topic.
- Both offer non-core courses

Differences:

College:

- Annual Examination
- HomeWorks/Midterms
- Student's performance calculated in the form of a percentage
- Coaching Centers
- Content-based learning
- No option to drop courses

University:

- Semester system
- More workload, assignments, projects
- Student's performance calculated in the form of CGPA
- Prolong hours
- Skill-based learning
- The student has the choice to drop courses

Facts and Statistics:

Note: These facts and statistics might or might not be included in our essay. Use these if required.

- According to UNICEF, An estimated 22.8 million children aged 5-16 are not attending schools in Pakistan
- According to HEC, there were 1295178 students enrolled in Pakistan universities in 2014-15
- Pakistan gained independence from the British Indian Empire in 1947. At the time, there were only two higher education institutions; there are now 174. (article written in 2016)
